

28th April 2008.

To whom it may concern

Subject: Innovation Waste Management Ltd.

Dane Color UK have been trading with Innovation Waste for the past two years, with Innovation handling all hazardous and non-compactor waste from our plant at Stalybridge, Cheshire.

We have always found Innovation Waste to be pro-active and honest in all of our dealings; they have also been helpful and creative in solving any issues we may have.

We consider Innovation Waste Management to be an open, honest, helpful company to trade with and we look forward to many more years of an excellent working relationship with this waste provider.
